

About EFSD: The EFSD was created in 1999 by the European Association for the Study of Diabetes to encourage and support research in the field of diabetes, to rapidly diffuse acquired knowledge, and to facilitate its application.

About Lilly Diabetes: While Lilly is a world leader in insulin production, the company recognises that it takes more than medicine to overcome the challenges of diabetes. Lilly's support of research funding reflects a commitment to improving and simplifying diabetes management, and continually pushing the boundaries of science and technology to help close gaps in treatment and support.

**The EFSD and Lilly Research Programme:
You're committed to positively affecting
diabetes. We're committed to helping you.**

**During 2011-2013, the European Foundation for the Study of
Diabetes (EFSD) and Lilly will grant €2.1 million in research funding.**

HUDBT00023
A dokumentum lezárásának dátuma: 2011.05.31.
Lilly Hungária Kft 1075 Budapest, Madách u. 13-14.

Encouraging innovative research in the fields of diabetes and its complications, and promoting excellence in medical education

You're invited to apply

During 2011-2013, €2.1 million in research funding will be awarded.

Reporting requirements: All investigators funded by this Programme are required to submit a scientific report at the end of the funding period. For those projects where funding is distributed over a period of more than one year, interim progress reports will also be required. Such reports will be subject to assessments prior to the release of any further funds.

Applications will be reviewed on the following criteria:

- Research must be conducted in institutions from Europe and associated countries
- Basic and clinical research
- Relevance to this Programme
- Development and integration of conceptual framework, methods and analyses
- Originality and innovation
- Investigator experience and credentials
- Appropriate scientific environment for study
- Budget request
