

Welcome to Aalborg Psychiatric Summer School 2012

announcement

Aalborg Psychiatric Hospital, which is part of Aarhus University Hospital, arranges for the seventh time *Aalborg Psychiatric Summer School*, August 27 – 31, 2012. This year we offer two 1-week courses, two 2-3-day courses and one 1-day course:

- **SCAN – Present State Examination (27.08.12 – 31.08.12)**
- **Mixed Methods Research Design (27.08.12 – 31.08.12)**
- **Basic psychopharmacology (27.08.12 – 28.08.12)**
- **Advanced psychopharmacology (29.08.12 – 31.08.12)**
- **Statistics for clinicians (28.08.12)**

We intent, besides offering relevant courses of a high professional level, to gather young clinicians and researchers together with seniors in an international professional and social creation of networks.

We have some of the best Danish and international teachers. The training consists of a mix of presentation and workshops. The limited number of participants accommodates the need for intensive personal training in an interaction between teachers, course faculty and fellow participants.

The courses:

SCAN – Present State Examination (27.08.12 – 31.08.12, 5 days) [only for Scandinavian speaking participants]

- Target audience is mainly physicians and psychologists
- Theoretical training in psychopathology, instruction and training in the use of PSE for patient interview
- The course has been approved as an official SCAN course. The teachers are authorized SCAN teachers.
- Language: Danish and English.
- Number of participants: 8 (target audience: Denmark, Norway and Sweden).
- Course leaders: psychologist Anelia Larsen, PhD

Mixed Methods Research Design (27.08.12 – 31.08.12, 5 days)

- Target audience is graduate students, physician researchers and others interested in designing mixed methods projects that use qualitative and quantitative data in their research.
- After attending this course, participants will 1) understand basics of conducting mixed methods research, 2) develop rigorous mixed methods research questions appropriate to their topics, 3) identify appropriate qualitative and quantitative data sources, 4) understand mixed methods designs, 5) choose one mixed methods design appropriate to their research questions, 6) develop an implementation plan using a mixed methods implementation matrix, 7) prepare for data mixing/integration, and 8) develop a plan for publication and consider approaches for responding to reviews.
- To get the most out of the workshop, participants should expect to do assignments about one hour each day after the workshop!
- Language: English with Danish support.
- Number of participants: 20 (international audience)
- Course leaders: Michael Fetters, MD, MPH, MA-Mixed Methodologist and Rikke Jørgensen, MSN, PhD student

Basic psychopharmacology (27.08.12 – 28.08.12, 2 days)

- Target audience is physicians and psychologists and others interested in psychopharmacology.
- The course in basic psychopharmacology introduces the participants to general pharmacological principles and systems. This course gives the necessary knowledge for participation in the advanced psychopharmacological course.
- Language: Depending on the participants. If there are any international participants, the language will be English otherwise Danish.
- Number of participants: 14 (international audience)
- Course leader: physician, PhD student René Ernst Nielsen.

Advanced psychopharmacology (29.08.12 – 31.08.12, 3 days)

- Target audience is physicians and psychologists.
- International and Danish lecturers will give insights into clinical psychopharmacology. The participants are requested to send cases with psychopharmacological problems – to be discussed during the course
- Language: Depending on the participants. If there are any international participants, the language will be English otherwise Danish.
- Number of participants: 14 (international audience)
- Course leader: physician, PhD student René Ernst Nielsen.

Statistics for clinicians (28.08.12, 1 day)

- Target audience is all clinicians without prior experience with statistics.
- The course gives an introduction to basic statistical concepts and analyses, so the participants can relate to the statistical results in scientific publications.
- Language: Depending on the participants. If there are any international participants, the language will be English otherwise Danish.
- Number of participants: 12-16 (international audience)
- Course leader: Biostatistician Signe O. W. Jensen.

Registration fee

- SCAN: Euro **400**
- *Mixed Methods Research Design*: Euro **335**
- *Basic Psychopharmacology, Advanced Psychopharmacology*: Euro **190**
(If you choose to follow both the *Basic Psychopharmacology* course and the follow-up course *Advanced Psychopharmacology* the price for the two courses will be Euro **335**)
- *Statistics for clinicians*: Euro **135**

The fee includes training, course material, lunch, coffee/tea morning and afternoon and social events.

Aalborg Psychiatric Summer School receives financial support from AstraZeneca A/S, Bristol-Myers Squibb, Janssen A/S and Servier Denmark.

Accommodation
